

C3 Environmental Management

Whilst the site does not hold an official accreditation for an environmental management system (EMS), the site is governed by a comprehensive EMS which is in line with ISO 14001 standards for the monitoring and minimisation of any environmental impacts.

1. Operational Procedures:

Documented procedures for chemical handling, foam injection, and emission control.

See document reference: C3(a) SOP-033-01 Press Safety Operations

Preventive maintenance in place, to ensure the integrity of containment and monitoring systems.

2. Training and Competency:

Regular staff training on hazardous substance management and emergency response.

See document reference: C3(b) SOP-032-01 Environmental incident emergency procedure for isocyanate spillage.

Emergency drills are conducted semi-annually to ensure preparedness.

3. Continuous Improvement:

Annual reviews will take place to identify improvements in emission reduction and process efficiency.

We welcome periodic audits to verify compliance with the conditions in the permit. Should the audit identify any issues then we will work with Knowsley Council to resolve any issues as quickly as possible.
